### DIRECTIONS FOR USE:

SoluPlus Winter™ has been developed as a soluble fertiliser for foliar application to turf. A low N high K formulation with added Iron and Magnesium to maintain strong healthy hardened turf through the winter months. It is designed to be absorbed by plant foliage and will not burn or scorch plant growth when applied at recommended rates.

### MIXING INSTRUCTIONS:

1. Add one quarter of the spray water to the tank and begin agitation.
2. Either pre-dissolve the powder in 5 times its volume of water or add to the inlet screen of the spray tank and wash into the spray tank with the remainder of the water.
3. Add any trace elements next starting with solids, then dispersions and finally solutions.
4. Lastly, add any chemicals.
5. Apply immediately. Do not store mixed chemicals.

Note: where a product datasheet specifies that the products should be added in a different order than above i.e. copper hydroxide etc then follow those instructions. If any doubt about compatibility or if unfamiliar chemicals are being used, then a trial mix is recommended.

### APPLICATION RATES:

| Turf  | Rate  |
|---|---|
| Sports fields, Golf Fairways, and Amenity Lawns | 20-60kgs per ha in 250L water<br>300-600gms per 100m <sup>2</sup> in 5L water |
| Golf Greens, Tees and Surrounds                 | 10-60kgs per ha in 250L water   |
| Bowling Greens                                  | 3-8kgs per green in 50L water   |

\*Triacontinol is a growth enhancer
