

L-93 XD

CREeping BENTGRASS

“XD” for Extra Disease Tolerance

- ✓ Excellent tolerance to dollar spot and other diseases
- ✓ Fine leaf texture
- ✓ Deep green color
- ✓ High density in spring, summer and fall

L-93 XD on a green in Lexington, Kentucky USA

Characteristics: Get an extra edge on disease with L-93 XD creeping bentgrass (*Agrostis stolonifera*). L-93 XD was developed and selected under high disease pressure to create a bent with improved tolerance and excellent turf quality. L-93 XD is tough and beautiful with fine leaf texture and great color.

Adaptation: L-93 XD is best suited to golf greens and is adaptable to tees, approaches and fairways. It thrives across the cool, temperate regions of the world and is adapted well into the transition zone between warm- and cool-season areas.

Recommended Seeding Rate:

New Seeding:

1-2 lbs. per 1000 ft² (5-10 g/m²)

Interseeding: 2-4 lbs. per 1000 ft² (10-20 g/m²)

NTEP Highlights: Independent data from trials conducted in 2014 by the National Turfgrass Evaluation Program (NTEP) on greens (20 entries, 18 locations) and fairway/tees (17 entries, 15 locations) show L-93 XD strengths:

- ◆ **Quality**—#1 California Golf Club of San Francisco greens test, tied #2 Los Angeles Country Club greens test, #1 NJ1 greens, tied #2 IN1 greens, tied #2 LPI Group 3 greens, tied #2 LPI Group 1 fairway, tied #3 LPI group 2 fairway
- ◆ **Dollar Spot**—Tied # 2 greens test, #2 fairway test
- ◆ **Leaf Texture**—#1 fairway test
- ◆ **Turf Density**—#3 spring density greens, #2 fall density greens, #2 fall density fairways
