

# MESA 30

30-0-0

195 SGN

100% MESA

## UNIQUE FEATURES

- 100% MESA for slow release of nitrogen with immediate green up without surge growth
- Consistent and efficient feeding for year round application
- Methylene urea nitrogen source that provides extended feeding to the turf through microbial release without the need for coatings which closely matches turfgrass demand for nitrogen

## TECHNOLOGY

MESA® is a unique nitrogen source that combines ammonium sulfate with methylene urea in a single, homogeneous particle. The result is an extremely effective and controlled nitrogen source that produces consistent, dark green color without excessive growth. Unlike coated nitrogen technologies, MESA does not lose its slowrelease properties when cracked, chipped, crushed or broken.

## USE PATTERNS

Use MESA 30 product on tees, fairways and high performance sports turf all year round for enduring colour and vigour. Use at the rate of 100 to 280 kg/ha.

## GUARANTEED ANALYSIS

<b>Nitrogen (N)</b>	30%
(WIN 6.5%)	
(Ammonia N 10%)	
(Urea N 3%)	
(Other water soluble Nitrogen (10.5%))	
<b>Phosphorus (P)</b>	0%
<b>Potassium (K)</b>	0%
<b>Sulphur (S)</b>	12%

## APPLICATION RATES

100 to 280 kg/ha  
or 1 to 2.8 kg/100m<sup>2</sup>

## SPREADER SETTINGS

	1.4 kg/100m <sup>2</sup>
Lebanon	4.5
Accupro	K
Lesco	1 / 17

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
