

MP GREENS 24

24-1-6
100 SGN

UNIQUE FEATURES

- Micro-prill (100 SGN) provides optimum distribution of fertiliser granules resulting in a uniform nitrogen application and release
- 70% of the nitrogen is derived from Methydure® methylene urea – slow-release nitrogen provides extended feeding

TECHNOLOGY

MP GREENS 24 contains methylene urea slow-release fertiliser technology which is well proven to provide a gradual, consistent nutrient release and longevity allowing fewer applications (up to 12 to 16 weeks) for effective feeding. All the potassium is derived from sulphate of potash, a safe and natural source of potassium and sulphur.

USE PATTERNS

Use MP GREENS 24 at a rate of 200 kg/ha (10 bags) to 300 kg/ha (15 bags). Apply to dry turf then wash-in or allow overnight irrigation or rain to wash-in. It is important to calibrate application equipment before applying product to turf.

GUARANTEED ANALYSIS

Nitrogen (N) 24%
(Urea Nitrogen 8.4%)
(Ammoniacal Nitrogen 0.5%)
(Water Insoluble Nitrogen (WIN) 8.0%)
(Other water soluble Nitrogen 7.1%)

Phosphorus 1.0%

Potassium (K) 6.0%

Sulphur (S) 2.4%

Derived From:

Ammonium phosphate, methylene urea, potassium sulphate, urea.

APPLICATION RATES

200 to 300 kg/ha or 2 to 3 kg/100m²
