

MP N-DURE

46-0-0
250 SGN

UNIQUE FEATURES

- Contains stabilised urea which provides slow release of urea based nitrogen for sustained renovation recovery.
- Using MP N-DURE instead of urea will result in an average 50% reduction in volatilisation losses

TECHNOLOGY

MP N-DURE is uniquely formulated with the world's only commercially available urease inhibitor, NBPT and the leading nitrification inhibitor, Dicyandiamide. Together, these additives work synergistically to overcome nitrogen loss from urea due to volatilisation, denitrification, and leaching. The result is that more of the nitrogen applied stays where it is intended for improved performance, value, and environmental responsibility.

USE PATTERNS

Use MP N-DURE at a rate of 100 kg/ha (5 bags) to 150 kg/ha (7.5 bags). Apply to dry turf then wash-in immediately. Has slight burn potential. It is important to calibrate application equipment before applying product to turf.

GUARANTEED ANALYSIS

Nitrogen (N) (Urea Nitrogen 100%)	46%
Phosphorus	0%
Potassium (K)	0%
Sulphur (S)	0%

Derived From:

Stabilised Urea Nitrogen

APPLICATION RATES

100 to 150 kg/ha or 1 to 1.5 kg/100m²
