

CHALLENGER
PREMIUM TURF SEED

MP STADIUM

Premium Ryegrass Blend

DESCRIPTION

When only the best will do, MP STADIUM is the go-to. It excels as a premium high performance perennial ryegrass blend designed specifically for high profile surfaces. It is carefully selected from the finest dark coloured varieties available. MP STADIUM germinates quickly and attains excellent shoot density soon after. It has excellent wear tolerance and competes aggressively with weeds and wintergrass. The dark green, dense sward consistently delivers an excellent cut quality and holds striping well.

High profile surfaces often demand sustaining ryegrass well into summer and with its resistance to summer diseases, maintaining it to a high standard is achievable. The versatility of MP STADIUM allows top-ups at any time of the year to support permanent surfaces where required.

Go to MP STADIUM as a top performer for golf, sports venues and high-profile lawns.

UNIQUE FEATURES

- Fast germination and establishment
- Good early season and mid-winter establishment
- Attractive dark green colour
- Excellent disease resistance
- Ideal for overseeding or permanent cover
- High shoot density for lush appearance and excellent cutting qualities
- Performs well under drought and heat tolerance

SEEDING RATES

Initial sowing: 250 to 500 kg/ha

In season top-up: 150 to 300 kg/ha

Premium Ryegrass Blend

ESTABLISHMENT AND GROW-IN TIPS

To ensure full realisation of the seed genetics, it is critical to supply suitable nutrition to the germinating and establishing seedling. Consider these steps and ask your Technical Representative for more details.

1. Apply **MP ROOTS + MP REINFORCE + TriCure AD** directly over the top of newly sown seed
 2. Apply **MP TURF STARTER** 7 to 10 days later
- **MP ROOTS** delivers an accessible balanced nutrition package in combination with rhizosphere stimulating bacteria and VAM (Vesicular Arbuscular Mycorrhizas).
 - **MP REINFORCE** delivers readily available silica for deposition in early roots and leaves, encouraging seedling strength and vitality.
 - **TriCure AD** increases water uptake for faster germination, while promoting uniform water distribution in the germination zone to ensure the seedling has unincumbered access to water and nutrients. Increased root mass and length has been documented (Rutgers University, 2001).
 - **MP TURF STARTER** is perfect as the nutritional base in the soil to set the seedlings up for the entire growing season.
