

SeaMist

SALT TOLERANT SLENDER CREEPING RED FESCUE

SEAMIST SLENDER CREEPING RED FESCUE

THE NEW WAVE IN SLENDER CREEPING RED FESCUE

- HIGH SALT TOLERANCE
- VERY DENSE TURF
- EARLY SPRING GREEN UP
- #1 NTEP IN TURF QUALITY
- GOOD VIGOR AND ESTABLISHMENT
- EXCELLENT WEAR TOLERANCE

SeaMist is a revolutionary slender creeping red fescue that can germinate in water that is *up to 40% as saline as sea water*. This extreme salt tolerance makes **SeaMist** an ideal choice in areas where effluent water is used to irrigate or in areas that are exposed to sea water and spray. **SeaMist** has excellent seedling vigor that results in a high establishment rate. **SeaMist** is a very dense turf with excellent turf quality, rating #1 in the recent NTEP trials. In addition to great shade tolerance, **SeaMist** has excellent wear tolerance and early spring green up.

NTEP DATA

| | VARIETY | TURF QUALITY CA. GOLF CLUB | TURF QUALITY SHADE | TURF QUALITY TRAFFIC | SPRING DENSITY |
|---------------------------|----------------|-------------------------------|-----------------------|-------------------------|-------------------|
| STRONG SLENDER | SEAMIST | 7.0 (#1) | 7.8 (#1) | 5.8 (#1) | 6.5 |
| | SEABREEZE GT | 5.6 | 7.6 | 4.4 | 4.8 |
| | BAR FRT 5002 | 6.2 | 7.5 | 5.8 | 5.7 |
| | MARVEL | 6.4 | 7.3 | 4.9 | 5.8 |
| | KENT | 5.8 | 6.6 | 4.8 | 5.8 |
| | LSD VALUE | 1.2 | 1.0 | 1.1 | 0.6 |

2015 FINELEAF FESCUE NTEP DATA. TURFGRASS QUALITY AND OTHER RATINGS 1-9; 9=BEST

AREAS OF USE

- RESIDENTIAL TURF
- ROADSIDES
- GOLF COURSE ROUGHS
- SKI SLOPES
- ENVIRONMENTALLY SENSITIVE AREAS
- WILDFLOWER MIXES

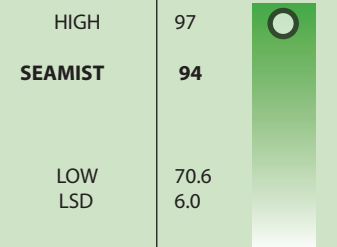

SEEDLING VIGOR

SeaMist has excellent seedling vigor, performing well across all locations.

2015 NTEP Seedling Vigor Mean Rating

% ESTABLISHMENT

SeaMist establishes well, statistically rating in the top group.

2015 NTEP Percent Establishment Rating Mean, Raleigh, North Carolina.

SEEDING Broadcast SeaMist seed at 5-5 lbs. per 1,000 sq./ft for most applications. Erosion control and reclamation areas and ski slopes should be seeded at 150-200 lbs. per acre depending on the turf density desired. Seed golf course roughs at 200 lbs. per acre.

MAINTENANCE SeaMist quickly establishes over a broad range of growing and environmental conditions in most soils, particularly when initial irrigation is available. On sensitive areas and slopes, levels of maintenance can be minimal with no fertilization and one mowing per season. In other turf areas, whether used alone or in combination with other grasses, maintain stand at 2 1/2 to 3" in height. A starter type fertilizer, applied at time of seeding, will greatly enhance establishment and "fill-in".
