

CC COMPLETE

12-1-10 + Traces + Biostimulants

80 SGN

Premium greens grade granular fertiliser with added kelp and humic acids, formulated to support turf health and performance under challenging environmental conditions.

UNIQUE FEATURES

- 80% of nitrogen derived from sulphate of ammonia (SOA) providing a rapid acting nitrogen source to support recovery and immediate energy requirements
- Contains 10% potassium in plant available form to support turf tolerance to abiotic stress
- Provides 15% sulphur in a plant available form to support chlorophyll production & enhance turf colour
- Includes iron, magnesium & manganese to support photosynthesis & improve natural stress resilience
- Contains kelp and humic acids to enhance turf health and nutrient uptake
- Formulated with micro dispersible technology to enable rapid dispersal into the turf canopy and reduce mower pick up

TECHNOLOGY

MP Complete is formulated with micro dispersible technology (MD) which integrates plant nutrients and stress-buffering biostimulants, such as kelp and humic acids, into a homogeneous granule, ensuring consistent nutrient and biostimulant delivery with every application. Each granule contains kelp and humic substances that function as stress-buffering biostimulants, supporting root development, enhancing plant defence responses, and helping protect plant cells under environmental stress such as heat, drought, and salinity. Following irrigation, granules rapidly disperse within the turf canopy, enabling immediate availability of biostimulants while facilitating efficient movement of nutrients into the turf-soil system. This improves nutrient utilisation and minimises potential product loss from mowing or surface removal.

GUARANTEED ANALYSIS

Nitrogen (N)	12%
Ammoniacal Nitrogen	10.7%
Urea Nitrogen	1.3%
Phosphorus (P)	1%
Potassium (K)	10%
Magnesium (Mg)	0.5%
Sulphur (S)	15%
Iron (Fe)	1.5%
Manganese (Mn)	0.5%
Humic Acids	1%
Kelp	1%

APPLICATION RATES

135 - 250 kg/Ha or 1.35 - 2.5 kg/100m²
 Actual nitrogen (N) applied per Ha
 135 kg/Ha = 16.2 kg actual N/Ha
 250 kg/Ha = 30 kg actual N/Ha

SPREADER SETTINGS

	1.35 kg /100 m ²	2.5 kg /100 m ²
Accupro	E	G
Living Turf CBRIVSS	D	E
Earthway	10	12
Lesco (letters)	D	F
Lesco (numbers)	14	16

The spreader settings are close approximations. Trial calibration is recommended before widespread use.

USE PATTERNS

Apply MP Complete throughout the growing season to deliver nutrients efficiently in line with turf growth requirements. Irrigate following application. Apply at 135-250 kg/ha
