

# Caravelle

Turf Ryegrass

Great Seed ... Great Results

## Caravelle

Caravelle is a proven performer in winter overseeding of warm season grasses such as Couch and Kikuyu. Caravelle is unique for this use as it is a perennial ryegrass and not a transitional rye or annual rye which are often used. This means it germinates quickly with good seedling vigour to produce a dark green, dense turf sward.

Importantly, it delivers an excellent surface during the winter months as opposed to some of the “transitional” types which germinate quickly but are not particularly high turf quality.

Caravelle is not heat or drought tolerant and will naturally start to transition out of your warm season grass when temperatures remain above 20°C.

## Features & Benefits

- Dark green colour
- Quick germination
- Very good density
- Natural heat and drought “intolerance”
- Excellent winter overseeding option
- Naturally transitions out of warm season grasses in hot conditions

## Seeding Rates

- Rate/m<sup>2</sup> 30 to 50 g
- Rate/100m<sup>2</sup> 3 to 5 kg
- Rate/ha 300 to 500 kg
