

# MP CARBON GREEN

**9-1-9**

120 SGN Homogeneous Granule  
Carbon + Calcium + Magnesium + Humate

## UNIQUE FEATURES

- High carbon formula builds healthy soils
- Slow release nitrogen powers sustainable turf growth
- Homogeneous formulation for uniformity of distribution
- Calcium and magnesium to balance soil chemistry
- Concentrated humates enhance nutrient turnover & availability
- Unique organics increase soil hydration and buffering

## TECHNOLOGY

MP CARBON GREEN® contains leonardite brown coal, which is commonly known as the best source for extraction of high grade potassium humate, a powerful soil conditioner. As a fertiliser additive, leonardite is credited with increasing the availability of nitrogen, phosphorus and trace elements. By employing this unique additive, MP CARBON GREEN is able to deliver significantly higher quantities of pure element carbon than liquid humic fertilisers.

## USE PATTERNS

MP CARBON GREEN can be applied as a maintenance fertiliser, renovation, or after aeration when inclusion into the root zone can be achieved. Apply MP CARBON GREEN at 250 kg/ha for maintenance feeding or 500 kg/ha for renovation.

## GUARANTEED ANALYSIS

<b>Nitrogen (N)</b> (Ammonium 1.5%) (Urea 2.9%) (Methylene Urea 4.6%)	9%
<b>Phosphorus (P)</b>	1%
<b>Potassium (K)</b>	9%
<b>Sulphur (S)</b>	9.4%
<b>Calcium (Ca)</b>	5%
<b>Magnesium (Mg)</b>	3%
<b>Carbon (C)</b>	6%
<b>Humate</b>	10%

## APPLICATION RATES

250 to 500 kg/ha  
or 2.5 to 5 kg/100 m<sup>2</sup>

## SPREADER SETTINGS

	2.5 kg/100 m <sup>2</sup>	5 kg/100 m <sup>2</sup>
Accupro	M	P
Lesco	J or 21	M or 26

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
