**GROUP I HERBICIDE**

## HERBICIDE RESISTANCE WARNING

Methar Tri-Kombi is a member of the Phenoxies group of herbicides. The product has the disruptors of plant cell growth mode of action. For weed resistance management Methar Tri-Kombi is a Group I herbicide. Some naturally occurring weed biotypes resistant to Methar Tri-Kombi and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weeds population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Methar Tri-Kombi or other Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Colin Campbell (Chemicals) Pty Ltd accepts no liability for any losses that may result from the failure of Methar Tri-Kombi to control resistant weeds.
