

SIX IRON

20-0-16

ADVANTAGES AND BENEFITS

- 60% of the nitrogen is in a slow release form from WIL-COTE I, a polymer coated urea, for long-term and uniform growth.
- Contains 6% iron for good initial green-up without a surge in growth.
- Is a high potassium formulated fertilizer for drought tolerance and cold hardiness.

DIRECTIONS FOR USE

Application Rate: Apply at 250 kg per hectare.

Apply to dry turf or foliage and irrigate thoroughly after application. Iron and other plant nutrients can cause staining of sidewalks. Sweep walkways prior to irrigation. Walkways should be dry at time of application. Keep away from pools, ponds, etc. Do not contaminate potable water. Do not apply with a drop-type spreader. The grinding action of these spreaders destroys the coating of the urea and will increase burn potential.

SPREADER SETTINGS

These suggested spreader settings are not intended to replace your normal calibrations. Calibrate your spreader before applying product.

| Spreader | Ground Speed | Width of Coverage | Spreader Settings (200 kg/ha) | Spreader Settings (250 kg/ha) |
|------------------------|--------------|-------------------|-------------------------------|-------------------------------|
| AccuPro® 2000 (cone 4) | 5 km/hr | 4.0 m | L ½ | M ¼ |
| Scotts® R8-A (cone 4) | 5 km/hr | 4.0 m | K | L |
| Spyker® 7622 | 5 km/hr | 3.0 m | 4.2 | 4.6 |
| Vicon (03 Series) | 7 km/hr | 10.0 m | 29 | 33 |
| Lebanon | 5 km/hr | 4.0 m | 6 | 7 |
