

MP GREENS 10

10-1-10
100 SGN

UNIQUE FEATURES

- Balanced NPK micro-prill (100 SGN) provides optimum distribution of fertiliser granules resulting in a uniform nitrogen application and release
- 100% of the nitrogen is derived from standard release Urea and ammonium.
- Iron (3%) provides deep green colour without excessive growth
- Manganese (0.5%) for enhanced chlorophyll production

TECHNOLOGY

MP GREENS 10 delivers a standard release nitrogen formula designed for situations where immediate response and recovery is essential. The nitrogen sources are derived from ammonium and urea, both of which provide specific benefits for turf health. Ammonium nitrogen provides an immediately available form of nitrogen that plants can take up quickly. This is particularly beneficial in cooler temperatures when microbial activity slows down, delaying the conversion of urea into ammonium and nitrate. Urea nitrogen needs to be converted into ammonium through enzymatic hydrolysis before the plant can use it. This process takes time, therefore providing a slower release of nitrogen. The combination of ammonium and urea nitrogen delivers a comprehensive approach to turf nutrition, ensuring both immediate and prolonged nitrogen availability. This mitigates nutrient loss while promoting consistent turf health, making it adaptable to varying soil types, environmental conditions, and seasonal changes.

USE PATTERNS

Use GREENS 10 on greens and wicket blocks at a rate of 200kg/ha to 300kg/ha. Apply to dry turf and irrigate immediately after application. It is important to calibrate application equipment before applying product to turf

GUARANTEED ANALYSIS

Nitrogen (N)	10%
(Urea Nitrogen 6.4%)	
(Ammoniacal Nitrogen 3.6%)	
Phosphorus (P)	1.0%
Potassium (K)	10.0%
Sulphur (S)	7.6%
Iron (Fe)	3.0%
Manganese	0.5%

Derived from:

Urea, Ammonium phosphate, Ammonium sulphate, potassium sulphate, Iron sucrate, Manganese sucrate

APPLICATION RATES

200 to 300 kg/ha
or 2 to 3 kg/100m²
