

MP KELPLUS

Kelp + Beneficial Microbes

Liquid kelp formulation for resilient plants
& healthy soils

MP KELPLUS® combines a liquid tri-kelp complex with VM3 Organics, plant-based amino acids, and carbohydrates. This advanced formula promotes stress recovery, strengthens plant defences, and enriches soil biology for healthier, more resilient plants.

BENEFITS

- **Kelp** extractas from *Sargassum*, *A. Nodosum* and *Laminaria*:
 - Increase nutrient content in soil
 - Support root and shoot growth
 - Aid in seed germination
 - Strengthen plant defence mechanisms
- **VM3** enhances soil biology and nutrient cycling
- **Trace elements** facilitate photosynthesis, enzyme activation, and regulation of plant growth
- **Organic acids** improve plant stress response and nutrient uptake by plants

TECHNOLOGY

MP KELPLUS® is formulated with a liquid tri-kelp complex designed to stimulate and support root growth and stress recovery. The formula contains high-concentration kelp extracts from *Sargassum*, *Ascophyllum nodosum*, and *Laminaria*, along with VM3 Organics, plant-derived amino acids, and carbohydrates.

VM3 is a proprietary organic technology that incorporates beneficial bacteria, trace minerals, and plant stimulants to enhance nutrient availability and longevity. Additionally, beneficial microbes, amino acids, and carbohydrates work together to support plant growth, enhance nutrient mineralisation, and improve soil biology.

USE PATTERNS	APPLICATION RATES
Established Plants	10-15 mL/L or 5-10 L/Ha or 0.5-1 mL/m ²
Seedling Transplants	3-5 mL/L or 1.5-2.5 L/Ha or 0.15-0.25 mL/m ²

MP KELPLUS can be applied as a foliar spray or soil application. It is most effective when lightly watered into the soil or mixed with irrigation water.
