LEEMCO PIPING SOLUTIONS - NOW AVAILABLE IN AUSTRALIA.

Leemco Inc. Piping Solutions offers a full line of high strength, corrosion resistant ductile iron fittings, joint restraints, stainless steel saddles, lateral and self-restraining valves - a wide range of quality HDPE and PVC pipe products with stainless-steel options that optimise irrigation system quality and streamline installation with labour-saving design.

WHY CHOOSE LEEMCO - AN OVERVIEW:

INDUSTRY-BEST WARRANTY

Leemco's standard **5-Year Warranty** is an industry best which includes both replacement parts and labour replacement fees. **However, if a complete Leemco system is used on the same project, (3 product categories or more) the product warranty increases to an amazing 10-Years on both parts and labour!**

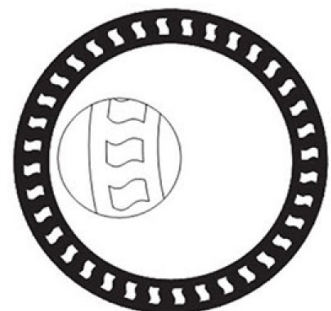

DURABLE EPOXY COATING

- Durable fusion bonded epoxy coating
- Applied inside and outside of all ductile iron products
- Protects against high corrosive soil conditions and acidic water
- Ideal for chemical injector and sulfur burner systems

SUPERIOR GASKET DESIGN

- Made of high quality EPDM rubber with U-Cup gasket design
- Ribbed segments assure a water-tight seal under low pressures
- U-Cup gasket expands under high pressures for tight seal
- Unique design makes inserting pipe effortless

LEEMCO FITTINGS HAVE FOUR LUGS

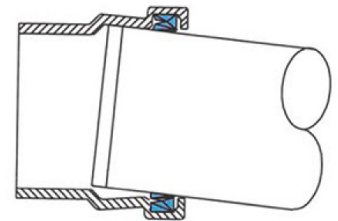

- Convenient for multiple applications
- Ideal for Leemco LH & LHD-Series Joint Restraints
- Convenient for SBR's and plugs

SLANT BELL DESIGN

- Allows pipe deflection of 5 degrees in all directions
- Leemco fittings allow a total deflection of 10 degrees
- Relieves stress on angled pipe
- Provides for easier installation

INNOVATIVE LATERAL TO MAINLINE CONNECTION

- Fusion-bonded epoxy coating
- Easy to install built-in restraint system
- Self-restrained bell clamps directly to plastic pipe
- Bayonet-style attachment allowing true 360 degree rotation
- Compatible with lateral tee or lateral saddle
- No threads or galvanised fittings needed
- 100% stainless steel valve mechanism
- Blunt cast serrations will not damage pipe surface
- Completely top serviceable
- Low rising stainless steel stem
- Life-time lubricated EPDM O-ring seal
- EPDM rubber valve disk for drip tight shut-off

SUPERIOR MAINLINE GATE VALVES

- Fusion-bonded epoxy coating
- Spigot x Bell, Bell x Bell, Flanged and Mechanical Joint Models
- Direct connection to Leemco gasketed tees
- Easy to install built-in restraint system
- Self-restrained bell clamps directly to plastic pipe
- Blunt cast serrations will not damage pipe surface
- No concrete thrust block or rebar needed
- Slotted skirt accommodates sleeve for access to the 2" operating nut

STAINLESS STEEL PRODUCTS

- Gate valves, ball valves and lateral angle valves
- Lateral saddles with ACME outlet
- Variety of threaded fittings and threaded risers
- 100% lead free stainless steel construction
- Available in 304 or 316-Series stainless steel
- Extended warranties available for stainless products

SUPERIOR JOINT RESTRAINT SYSTEM

- Eliminates concrete thrust blocks
- Fusion-bonded epoxy coating
- Self-Restrained fittings
- Easy to install 2-bolt, 4-bolt and 6-bolt systems
- Save valuable time and labour costs
- Blunt cast serrations will not damage pipe surface
- Pressurise mainline immediately after install
- Can be used with a wide variety of design applications
(as shown on the following page)

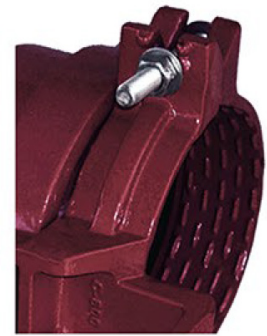

SELF-RESTRAINT FITTINGS ELIMINATE CONCRETE THRUST BLOCKS

- Thrust force is confined to pipeline
- Not dependent on soil composition, compaction or saturation
- Easy to install 2-bolt joint restraint
- Pressurise immediately after install
- High quality, consistent and cost effective results

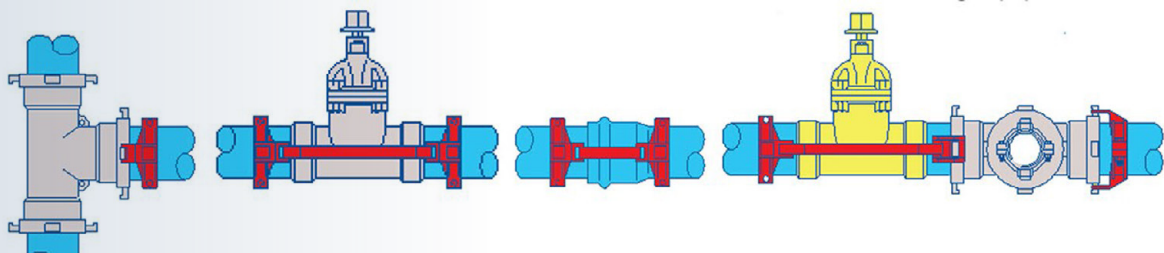

ADVANCED DESIGN FEATURES

- Blunt cast serrations will not damage pipe surface
- Does not compromise integrity of plastic pipe
- Epoxy coating protects against corrosive soil and water conditions
- Patented cast-on half clamp and detachable clamp
- 2-bolt system saving time and labour costs

LPP-SERIES JOINT RESTRAINT

- Fusion-bonded epoxy coating
- Restrains pipe bells before and after fittings
- Easy to install 2-bolt joint restraints
- Blunt cast serrations will not damage pipe surface

**There are over 100 ways to pour concrete thrust blocks...
and only one way to install Leemco Joint Restraints**

PRODUCT RANGES BEST SUITED TO THE AUSTRALIAN TURF INDUSTRY

Australian Turf Managers can now take advantage of some of the most practical, time and labour-saving product ranges. Discover how Leemco products can improve your irrigation system quality and longevity.

RSST SERIES - STAINLESS STEEL LATERAL SADDLES

Where a welded lateral saddle is normally required to connect to swing arm risers we can use a RSST stainless steel saddle.

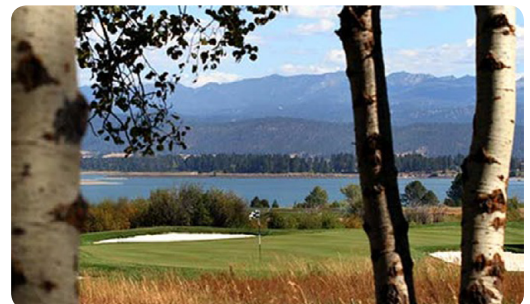

- Corrosion resistant 304 or 316 Stainless Steel construction
- Cost effective compare to welded poly saddle
- Simple to install with no special equipment required
- 1750 KPA rating
- 25 year warranty

RSST SERIES - MAINLINE SADDLES FOR FOR LV LATERAL VALVES

Connect mains to lateral vlavesl or valve-in-head sprinklers with threaded or gasket out let options.

- Ductile Iron Corrosion and Stainless Steel construction
- Cost effective compared to welded or flanged connections
- Compatible with LV Series Lateral Valves
- Quick to install with few components and no special equipment required
- 2400 KPA rating
- 10 year warranty

LV SERIES ANGLE VALVES

In conjunction with the RSST lateral saddle, lateral take-off becomes much easier and less costly than traditional configurations. Usually there would be a pipe piece out of the saddle going into a bend connected to another piece. This is then connected to an isolation valve and then connected to the lateral pipe.

Four of these parts and the installation of them are eliminated with the LV valve.

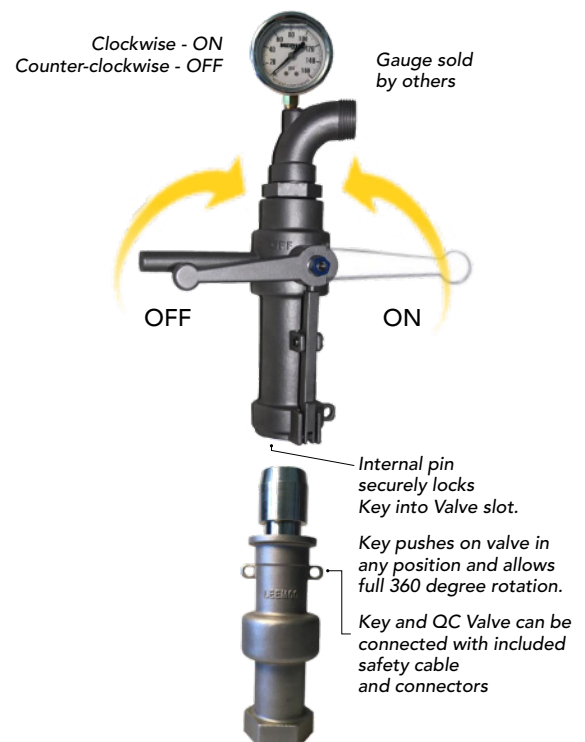

- Ductile Iron Corrosion and Stainless Steel construction
- Cost effective compared to traditional lateral connection process
- Quick to install and no special equipment required
- Inbuilt isolation easy for staged work
- 360 degree rotation with gasket connection to RSST saddle
- 2400 KPA rating
- 10 year warranty

QUICK COUPLING VALVES

Traditional QCV relies on turning motion sometimes leading to disconnection over time.

- Leemco QCV actuation does not require turning
- Can be safely actuated whilst operator not directly above
- Durable stainless steel construction
- Accepts hose swivel and pressure gauge connection
- Effluent option available

QCV STABILISER

The Leemco Stabiliser securely attaches to the base of the Quick Coupling Valve. Wide and extended wings, packed in the soil prevent the valve from rotating or moving in the vertical plane.

- Constructed of Class 350 ductile iron
- Fusion-bonded epoxy coating to protect against corrosive soil conditions
- LS-120 (3/4 and 1) Ductile iron quick coupling valve stabiliser
- LS-150 (1-1/2) Ductile iron quick coupling valve stabiliser
- Easy to install – 1-bolt design
