

# MP DEEP GREEN

## TURF PIGMENT

### UNIQUE FEATURES

- Enhances and extends aesthetic appearance of turf
- Instant dark, natural green colour
- Enhances the uniformity of turf
- Increases the photoperiod for enhanced photosynthesis
- Assists with turf quality during summer stress through UV reflectance

### TECHNOLOGY

#### ENHANCED EFFECT

MP DEEP GREEN is a unique blend of pigments that adheres to the waxy layers of turf grass plants and extend the aesthetic appearance of every turf surface. The blend ensures an instant dark rich green colour. Adding Wetout Spray adjuvant enhances the coverage and thus the uniformity of leaf adhesion. If turf grass is still green and active, the addition of MP Enrich will extend the colour effect as the natural green from chlorophyll is preserved and enhanced.

#### APPLICATION RATES

Initial rate	2.5 L/ha or 25 mL/100m <sup>2</sup>
Re-application rate	1 to 2.5 L/ha or 10 to 25 mL/100m <sup>2</sup>

Add WETOUT @ 75 mL / 100 L spray mix to enhance uniform coverage.

Avoid overspray onto concrete, masonry or other areas where colour is not desired. Accidental overspray can be washed off with water prior to drying.
