

MP ENRICH

1-0-0 + 5Fe + 4 Mn + 3Zn + VM3

Increased chlorophyll and enhanced colour

UNIQUE FEATURES

- Immune system boost, aiding in soil-borne disease resistance
- Dextrated chelated iron, manganese and zinc will not cause leaf burn
- Supplies balanced iron, manganese and zinc with optimal pH
- Accentuates rich green colour
- Contains plant and root stimulants and trace minerals
- Safe tank mixing with MATCHPLAY Superior Liquid Range

TECHNOLOGY

MP ENRICH® is a specially formulated dextrated chelate liquid iron, manganese and zinc fertiliser that is easily absorbed by the leaves to produce a deep colour without causing any burn or damage. The balanced rates of dextrated chelated iron and zinc in MP ENRICH will bring out a natural deep green colour by aiding nitrogen metabolism and chlorophyll synthesis. Chelated iron, manganese and zinc sources have been shown to be superior as they are more efficient at supplying plants with iron than inorganic iron salts. The addition of foliar manganese increases plant uptake and utilisation. Doing so reduces the likelihood of manganese oxidation when applied directly to the soil.

VM3 ORGANICS

MP ENRICH contains VM3, a proprietary organic technology that enhances nutrient availability, longevity and compatibility for better turf performance. VM3 is a product of fermentation that incorporates several beneficial bacteria, trace minerals and plant stimulants.

USE PATTERNS

General rates for MP ENRICH are 20-40 L/ha applied with 150-500 L/ha of spray mix and is best suited to be applied as a foliar spray. Programmed applications in sand content profiles will assist in maintaining soil nutrients near the plant roots. Apply via boom spray, fertigation unit or fertispray.

GUARANTEED ANALYSIS

Nitrogen (N)	1%
Phosphorus (P)	0%
Potassium (K)	0%
Iron (Fe) As dextrated chelate	5%
Manganese (Mn) As acetate and sulphate	4%
Zinc (Zn) As dextrated chelate	3%

APPLICATION RATES

20 to 40 L/ha of MP ENRICH in a minimum of 150 to 500 L/ha
