

MP GREEN STARTER

16-9-6

100 SGN Homogeneous Granule
Iron + Manganese

UNIQUE FEATURES

- Slow release nitrogen for steady turf response and colour up to 12 weeks
- High phosphorus formulation for root enhancement at renovations or turfgrass establishment by seeding or sprigging
- Ideal for use in stimulating recovery following or during the incidence of root disease

TECHNOLOGY

MP GREEN STARTER® is a homogeneous product providing a uniform turf response (such as improved growth and colour) with a highly dispersible granule based on Micro N Fusion technology. The high phosphorus formulation provides quick uptake for repair of root structures following disease or insect activity. Ideal for renovation to enhance root activity, recovery and colour. MP GREEN STARTER is easy to apply, with a low salt index and the additional advantage of negligible mower pickup. Methylene urea delivers 40% of the nitrogen to provide long term release and sustained availability.

USE PATTERNS

MP GREEN STARTER is ideal for repair of root structures following disease or insect activity. It can also be used as part of a renovation program where phosphorus levels need to be amended. It does not require immediate irrigation once applied to a dry turf surface (irrigation should be applied within 24 hours).

GUARANTEED ANALYSIS

Nitrogen (N)	16%
6.4% Urea Nitrogen	
4.2% Ammoniacal Nitrogen	
2.2% Water Insoluble Nitrogen (W.I.N)	
3.2% Other Water Soluble Nitrogen	
Phosphorus (P)	9%
Potassium (K)	6%
Sulphur (S)	2.8%
Iron (Fe)	1.5%
Manganese (Mn)	0.5%
Calcium (Ca)	1%

APPLICATION RATES

150 to 240 kg/ha
or 1.5 to 2.4 kg/100 m²

SPREADER SETTINGS

	1.5 kg/100 m ²	2.4 kg/100 m ²
Accupro	H	H ^{1/2}
Lesco	D or 10	D ^{1/2} or 11

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
