

MP HI PERFORMANCE

31-1-8
140 SGN
Iron + Manganese

UNIQUE FEATURES

- 100% of nitrogen as UMAXX, for safe and steady turf response
- Added iron and manganese for enhanced colour and enhanced assimilation
- Apply year round where steady and long term nitrogen feeding is desired
- UMAXX consistently supplies nitrogen for 10-12 weeks

TECHNOLOGY

UMAXX stabilised nitrogen is a premium slow release technology that performs regardless of soil temperature or weather. UMAXX technology contains two stabilisers that minimises losses due to volatilisation, denitrification and leaching. The result is a combination of up-front and sustained measure nitrogen release to turf plants.

USE PATTERNS

Use MP HI PERFORMANCE® on greens, tees and fairways through Spring and Summer for enduring colour and vigour to resist wear from increased traffic. It does not require immediate irrigation once applied to a dry turf surface (irrigation should be applied within 24 hours)

GUARANTEED ANALYSIS

Nitrogen (N)	31%
<small>(Stabilised Urea Nitrogen 30.4%) (Ammoniacal Nitrogen 0.6%)</small>	
Phosphorus (P)	1%
Potassium (K)	8%
Sulphur (S)	3.5%
Iron (Fe)	1.5%
Manganese (Mn)	0.5%

APPLICATION RATES

160 kg/ha
1.6 kg/100 m²

SPREADER SETTINGS

	1.6 kg/100 m²
Accupro	K
Lesco	I or 17

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
