

MP SAFE K

Potassium-rich fertiliser for enhanced plant growth & stress mitigation

2-0-21 + Beneficial Microbes

MP SAFE K is a specialised liquid potassium fertiliser designed to enhance plant health and performance. This unique formulation also includes VM3, an organic technology that improves nutrient availability and longevity. MP SAFE K ensures optimal leaf absorption and soil stability, enhances disease and stress tolerance, and reduces the negative effects of sodium in recycled irrigation water.

BENEFITS

- **High potassium** content aids in flowering and enhance environmental stress and disease tolerance
- **Small amount of Nitrogen 2%** to supports photosynthesis and plant growth
- **Beneficial microbes** improve nutrient uptake and enhance soil structure
- **Trace minerals** facilitate plant enzyme functioning and activation
- **Humates** increase nutrient uptake and improve soil structure
- **Kelp** support plant growth and aid in plant defence mechanisms

TECHNOLOGY

MP SAFE K is a uniquely formulated stabilised liquid potassium citrate fertiliser that features enhanced chelation, facilitating easy plant uptake and ensuring soil stability. MP SAFE K includes VM3, a proprietary organic technology that improves nutrient availability, longevity, and compatibility for superior plant performance. VM3 is derived from fermentation and contains several beneficial bacteria, trace minerals, and plant stimulants.

USE PATTERNS

TYPE	APPLICATION RATES
Established Plants	2.5 – 5 mL/L or 5-10 L/Ha or 0.5-1 mL/m ²
Seedling Transplants	1.25 mL/L or 1.5-2.5 L/Ha or 0.15-0.25 mL/m ²

MP SAFE K Can be applied as a foliar spray or soil drench.

Scheduled applications in sandy soil profiles will help maintain soil nutrients near the plant roots.

TYPICAL ANALYSIS

Nitrogen (N) (as ammonium acetate)	2.0%
Phosphorus (P)	0.0%
Potassium (K)	21.0%
