

MP SPRING START

16-1-10

100 SGN Homogeneous Granule
Magnesium + Manganese

UNIQUE FEATURES

- 65% of nitrogen as UMAXX and 25% as IBDU for ultimate turf response
- A balanced NPK in a homogeneous formula produces consistent growth
- Ideal for use before renovation or after extended periods of turf stress

TECHNOLOGY

UMAXX stabilised nitrogen and IBDU are both considered to be premium slow release technologies to reduce nutrient volatilisation and leaching to maximise both absorption by the turf and intensity of colour. Revolutionary dispersing granulation technology minimises mower pick-up after light irrigation.

USE PATTERNS

Use this product on greens and fine cut turf through Spring and Summer for efficient nutrient delivery to closely match growth requirements. Apply MP SPRING START at 125 to 250 kg/ha.

GUARANTEED ANALYSIS

Nitrogen (N)	16%
(Water Insoluble Nitrogen 3.6%)	
(Stabilised Urea Nitrogen 11.6%)	
(Ammonia Nitrogen 0.4%)	
(Other water soluble Nitrogen 0.4%)	
Phosphorus (P)	1%
Potassium (K)	10%
Calcium (Ca)	2%
Magnesium (Mg)	1%
Sulphur (S)	4%
Manganese (Mn)	0.5%

APPLICATION RATES

125 to 250 kg/ha
or 1.25 to 2.5 kg/100m²

SPREADER SETTINGS

	1.25 kg/100 m ²	2.5 kg/100 m ²
Accupro	E	G
Lesco	D or 14	G or 16

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
