

Enhancing ornamental plant performance through balanced nutrition and care from root to bloom.

The MATCHPLAY® ornamental range is designed to help ornamental plants flourish by combining essential nutrients with carefully selected biostimulants. This approach encourages strong root systems, improved stress tolerance, and consistent visual appeal. By considering soil structure and nutrient interactions, we offer practical, scientific recommendations to ensure your ornamental plants thrive across seasons, with resilience, colour, and consistency that elevate every landscape.

MATCHPLAY ORNAMENTALS

The Matchplay ornamental product range offers solutions that comprehensively address the nutritional requirements of all ornamental plants including Australian natives. Expertly formulated and manufactured locally in partnership with Living Turf, this innovative range combines advanced biological technologies with proven performance to support vibrant, resilient plant growth in every landscape.

GRANULAR NUTRITION TECHNOLOGIES

DURATION® is an advanced generation polymer coating technology that gradually meters nutrients for two months, four months or even all season long, to meet the plant’s needs. With release patterns being influenced by temperature, feeding closely matches plant growth cycles, resulting in enhanced efficiency, which is good for the environment and your bottom

ECO ADVANCE is unique technology that includes beneficial microbe strains that have been incorporated in the granulating process. These beneficial microbe strains are designed to dissolve the fine rock minerals into biologically available minerals that can then be used by the plants as required.

LIQUID NUTRITION TECHNOLOGIES

VM3 is a proprietary organic technology that enhances nutrient availability, longevity and compatibility for better turf performance. VM3 is a product of fermentation that incorporates several beneficial bacteria, trace minerals and plant stimulants such as aminos, kelps, fulvic and humic acids.

VAM (Vesicular Arbuscular Mycorrhiza) is a group of beneficial symbiotic fungi that can colonize up to 80% of the plant root mass. The fungal hyphae grow out into the soil further than the root hairs, thus enhancing access to ordinarily unavailable soil nutrients.

Beneficial bacteria to boost soil biology, increase soil carbon, stimulate plant growth and break down organic matter.

Trace elements with fulvic acids, humic acids, amino acids, kelps and sugars. This package works well together with beneficial bacteria to boost soil biology, increase soil carbon, stimulate plant growth and break down organic matter.

Surfactant included to ensure even coverage.

GRANULAR NUTRITION

| PRODUCT | DESCRIPTION | ANALYSIS | TECHNOLOGY |
|------------------------|--|----------|----------------------------------|
| MP LANDSCAPE SPECIAL | 6-month slow release NPK fertiliser with trace nutrients | 18-1-8 | Duration 180 |
| MP NATIVE & SHRUB FOOD | All purpose plant food for use all year round | 9-1-7 | Eco Advance Premium Biology |
| MP ROSE & FLOWER FOOD | Balanced food source for flowering plants | 7-4-13 | Eco Advance Premium Biology |
| MP TERRAMAXX | 3-month controlled release NPK fertiliser for planting and potting mix | 7-3-9 | PCU, Eco Advance Premium Biology |

LIQUID NUTRITION

| PRODUCT | DESCRIPTION | ANALYSIS | TECHNOLOGY |
|--------------|---|-------------------------------|---|
| MP NOURISH | NPK fertiliser with plant biostimulants with low phosphorus for natives | 10-1-11 + Beneficial Microbes |      |
| MP KELPLUS | Liquid kelp formulation for resilient plants & healthy soils | Kelp + Beneficial Microbes |     |
| MP PROMOTE | Advanced booster of beneficial microbes & bio stimulants | Beneficial Bacteria & Fungi |      |
| MP REINFORCE | Strengthens plant defences against stress | 3% Si | Monosilic acid |
| MP ROOTS | Liquid phosphorus fertiliser to aid plant root growth and development | 5-5-3 + Beneficial Microbes |      |
| MP SAFE K | Potassium-rich fertiliser to aid flowering & stress mitigation | 2-0-21 + Beneficial Microbes |     |

SOIL MOISTURE

| PRODUCT | DESCRIPTION | ANALYSIS | TECHNOLOGY |
|-----------------|-----------------------------------|--------------------------------|---|
| MP TREE & SHRUB | Biologically active wetting agent | Wetting agent + 3.14-0.42-3.73 |      |
