

NX GOLD

29-0-8
195 SGN

UNIQUE FEATURES

- 36% of nitrogen as MESA for immediate turf response and extended nitrogen feeding
- Delivers excellent colour and vigour whilst strengthening the turf sward
- Ideal where solid nitrogen is required in combination with zero phosphorus

TECHNOLOGY

MESA® is a unique nitrogen source that combines ammonium sulfate with methylene urea in a single, homogeneous particle. The result is an extremely effective and controlled nitrogen source that produces consistent, dark green color without excessive growth. Unlike coated nitrogen technologies, MESA does not lose its slow release properties when cracked, chipped, crushed or broken.

USE PATTERNS

Use NX GOLD® in Spring and Summer on higher cut turf to obtain colour and vigour with the benefit of additional strengthening of the turf sward from the blended potassium. Use at the rate of 90 to 180 kg/ ha.

GUARANTEED ANALYSIS

Nitrogen (N)	29%
(WIN 6.2%)	
(Ammonia N 3.5%)	
(Urea N 19.3%)	
Potassium (K)	8%
Sulphur (S)	4.2%

APPLICATION RATES

90 to 180 kg/ha
or 0.9 to 1.8 kg/100m²

SPREADER SETTINGS

	0.9 kg/100m ²	1.8 kg/100m ²
Lebanon	4	5
Accupro	H	M
Lesco	G or 15	J or 21

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
