

BENTGRASS HI N

28-2-14

UNIQUE FEATURES

- 70% of N as UMAXX stabilised nitrogen for efficient delivery to turf.
- Combination N sources with low P, soluble K and traces in one product.
- Uniform growth, deep root mass and consistent colour for 12-16 weeks.
- Water soluble fertiliser (wsf) for all turf surfaces.

TECHNOLOGY

UMAXX stabilised nitrogen is a premium slow release technology that performs regardless of soil temperature or weather. This is achieved through reduced volatilisation, denitrification and leaching meaning more usable nitrogen is delivered to the turf as it is needed.

USE PATTERNS

Use BENTGRASS HI N on all turf surfaces (especially those with sandy profiles) for enduring colour and vigour and to top up trace elements.
