

GENERAL INFORMATION

TriCureAD[®] is an advanced, non-phytotoxic wetting agent designed to prevent the development of hydrophobic soil conditions and Localized Dry Spots while optimizing use of rain and irrigation water.

Upper soil profiles contain varied combinations of soil, sand, thatch and organic amendments. These components interact and influence how water, air and nutrients are received. TriCureAD soil surfactant is formulated to effectively treat all of these soil and organic surfaces, without the risk of excessive water retention.

DIRECTIONS FOR USE

For best results, TriCureAD applications should begin in early spring, before first signs of heat-related stress appear. TriCureAD can also be applied curatively on existing dry areas and LDS. In warmer climates, application should be year-round or when environmental stress conditions begin to impact turf performance. Immediate watering-in is not necessary to prevent burning as TriCureAD is non-phytotoxic. For best results, heavy irrigation is recommended when applying to facilitate movement of chemical into the soil.

Spray Application

Applications can be made monthly or on a seasonal basis (effective approximately three months). Refer to the Spray Application Rates section to determine the appropriate rate. (Note: To maintain an even, optimum surfactant level in the soil, monthly applications are preferable.)

Application by Injection

Application of TriCureAD via irrigation lines is recommended where possible as surfactant is optimally disbursed and reduced application rates with comparable results are also often possible. Recommended rates are 5 lt per Hectare.

SPRAY APPLICATION RATES

ml / 100 m ² 10 lt. Water	Usage
120 ml / Monthly	Regular use for normal conditions
180 ml / Monthly	High stress conditions and curative for LDS
First application should be in early spring, or when first signs of heat stress appear.	

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

BENEFITS

- Prevents development of water-repellent soils
- Eliminates Localized Dry Spots
- Reduces channeling and preferential flow
- Prevents water loss due to run-off
- Reduces excess water retention
- Provides water penetration and uniform distribution of water to the root zone
- Conserves irrigation water
- Increases root mass and length
- Reduces labor costs associated with hand watering

TANK MIXING

Although TriCureAD[®] can be mixed with most chemicals used in turf management, it is recommended that field-testing be done on a small area before spraying to assure safety concerns are met.

PRECAUTIONARY STATEMENTS

- Overexposure causes eye irritation, excessive watering, redness
- Overexposure to skin may cause itching and redness
- Harmful if swallowed. May cause diarrhea, nausea and vomiting.
- Wear approved eye protection and clothing
- Keep out of reach of children

IN CASE OF CONTACT

- **EYES** If eye exposure occurs, wash with water for at least 15 minutes. See a physician.
- **SKIN** Eye and skin irritant. Wash skin and clothing thoroughly with water after exposure.
- **INGESTION** Contact physician or poison-control center. If victim is conscious and able to swallow, quickly give milk or water to dilute. Do not give sodium bicarbonate, vinegar, or fruit juices. Never give anything by mouth if victim is unconscious or having convulsions. Induce vomiting only upon advice of a physician.

STORAGE & DISPOSAL

Do not contaminate water, food or feed. Store in an approved facility out of reach of children or unauthorized personnel. Store in original container. Dispose of unused contents according to RCRA and all applicable national and local government regulations.

Containers may be disposed of after thorough rinsing and offered for recycling or reconditioning or disposed of according to approved national and local regulations. Do not reuse empty containers.

WARRANTY: Seller warrants that this material is suitable for the purpose stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any contrary to such directions. Seller makes no other expressed or implied warranty. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

KEEP OUT OF REACH OF CHILDREN. CONTAINS NON-PLANT-FOOD INGREDIENTS

Active Ingredient:
100% Oxirane 2-methyl polymer with oxirane

WARNING

Irritant to eyes, skin, and ingestion.

Use proper gloves and goggles when handling and wash hands before touching eyes or eating. Get medical advice/attention if you feel unwell. Dispose of contents/container in accordance with local/regional/national and international regulations.
